

Study
**International Logistics &
Transportation
Management, MSc**
at the UE

Become an expert and create a sustainable
and green future in logistics.

Why the UE?

The logistics industry is facing various new challenges - globalisation, constantly growing transport routes and possibilities have to be combined with topics such as sustainability as well as ecological and yet economic action. The Master's programme International Logistics & Transportation Management provides the optimal basis of management know-how as well as detailed expert knowledge of the logistics industry.

In addition to professional skills and knowledge taught by excellent professors from science and business, you will also strengthen your scientific methods during the master's programme. Through interdisciplinary modules and individual support, you will expand your social skills in order to successfully complete management roles. Case studies, business games, project and research internships with well-known business partners also expand your theoretical education. Depending on the time format in which you complete your studies, there is still enough time for a job to apply your theoretical knowledge directly in practice.
