

Ready for what's next

***Sentient* by Hollie Johnson**

Hollie is a Gunaikurnai and Monero Ngarigo woman from Gippsland who graduated from RMIT with a Bachelor of Arts (Photography) in 2016.

Within Hollie's family and the Nations she belongs to, line work is prominent and widely featured in many artworks across the Gunaikurnai Nation, with circles appearing in Monero Ngarigo pieces.

In the Gunaikurnai Nation, Hollie grew up knowing that diamonds and triangles symbolise men, while circles and semicircles represent women. This symbolism is depicted in the design, where the arrangement and colouring of these shapes connect them to their Ancestors who gave birth to them. The sequence of colours — Black, Red, Red, Black — represents this ancestral link.

The colouring of the line work illustrates the evolution of nature: from the sun, the giver of life (yellow), to the creation of land (green) through many First Nations Creation Stories, and finally to the sea (blue) that surrounds this beautiful Country.

Some lines intertwine, symbolising the interconnected paths of life; some are short, others endless, depicting the varied journeys individuals undertake. Some paths may intersect, while others may never touch, highlighting the diversity of life's experiences.

Acknowledgement of Country

RMIT University acknowledges the people of the Woi wurrung and Boon wurrung language groups of the eastern Kulin Nations on whose unceded lands we conduct the business of the University. RMIT University respectfully acknowledges their Ancestors and Elders, past and present.

RMIT also acknowledges the Traditional Custodians and their Ancestors of the lands and waters across Australia where we conduct our business.

This guide provides information about RMIT's Melbourne-based courses for Australian and New Zealand citizens and permanent residents of Australia. Prepared February 2025. Every effort has been made to ensure the information contained in this publication is accurate and current at the date of printing. Courses and subject content and requirements may be subject to change after publication of this guide. For the most up-to-date information, please refer to the RMIT University website before lodging your application.

Throughout this guide, we have used the following terminology:

- Course = Overall qualification (e.g. Bachelor of Science)
- Subject = Individual Unit (e.g. Chemistry Fundamentals CHEM1313)

Note that other material at RMIT (including some websites linked in this guide) may use different terminology, such as:

- Program = Overall qualification (e.g. Bachelor of Science)
- Course = Individual Unit (e.g. Chemistry Fundamentals CHEM1313)

If you have any questions about the terminology or need clarification before lodging your application, please contact Study@RMIT for assistance.

Why choose RMIT?

An RMIT education gets you ready for what's next.

RMIT is an international university of technology, design and enterprise. Since 1887 we've been recognised for our industry connections and hands-on approach to learning, and we're ranked among Australia's top 10 universities.¹

When you graduate from RMIT, you'll join a global community of more than 500,000 alumni equipped with the skills and experience to make an impact in today's industries, while being prepared for the opportunities of tomorrow.

Global leader in sustainability

The 2024 Times Higher Education University Impact Rankings recognise RMIT as the fifth best university globally for its impact towards multiple United Nations Sustainable Development Goals (SDGs), which cover areas such as reduced inequalities, climate action and sustainable cities and communities.

RMIT is also ranked 22nd globally in the 2025 Times Higher Education Interdisciplinary Science Rankings. This ranking reflects RMIT's longstanding commitment to taking a collaborative, interdisciplinary approach to investigating and solving global issues and challenges of social, economic and environmental importance.

Informed by industry

Many of RMIT's courses are taught by experts with years of experience in the field. Our learning plans are also shaped in consultation with specialised Industry Advisory Boards, which ensure that our students learn the skills employers are looking for – today and tomorrow.

Champion of inclusion

RMIT offers 17 unique scholarships for women students and for women in STEM, with 69 recipients in 2024. RMIT's Equity Access Schemes help women, trans and gender diverse applicants attain entry to RMIT programs in which they are underrepresented.

RMIT also offers equity scholarships for students experiencing financial hardships, disabilities and long-term medical conditions, and other circumstances that impact their study.

Forefront of innovation

RMIT teaches courses that help students gain skills for the future of work, including roles that don't yet exist. In 2024, RMIT introduced certificates, diplomas, degrees and short courses across areas such as commerce, product design, aviation maintenance, family violence and cyber security.

Industry partners

Connection to industry is proudly woven into RMIT's history. As a student, you'll build connections to your future employers while you learn, so you're ready to launch your career when you graduate.

RMIT partners with industry in four key areas.

Learning that puts theory into practice

You'll gain résumé-worthy work experience at RMIT, from projects to internships, placements and global experiences.

Teaching that's ahead of the curve

Our courses are taught by professionals with years of experience in your field. Course curriculums are also shaped alongside industry to ensure they stay ahead of workforce trends.

Mentoring that helps launch your career

RMIT Mentoring is a service for our students and fresh graduates, allowing you to get one-on-one career guidance from an experienced mentor.

Research that changes the world

As a research student, you could get involved in large, complex and multidisciplinary research projects by working with our industry, government, university and community partners.

We partner with thousands of industry leaders across the globe.

Explore our locations

Our award-winning locations are home to a thriving student population. They are constantly evolving and expanding to meet the needs of our students and of modern university life.

Bendigo Airfield

130km radius from Melbourne City

Melbourne Airport

Bonnie Brook

Hillside

Our Brunswick campus is a creative and multicultural hub. It is home to many of RMIT's design courses, including fashion, textiles and industrial design.

Keilor

Situated in the very heart of the CBD, the City campus has been an iconic part of the Melbourne skyline for more than 130 years.

Essendon

Brunswick

Sunshine

Melbourne

Port Melbourne

Hoppers Crossing

Werribee

Altona

Point Cook Aviation Centre

Our Point Cook and Bendigo aviation centres provide easy access to airspace, terrain and urban development to maximise navigational experiences.

Regions

■ Melbourne CBD ■ Inner City ■ Inner suburban ■ Middle suburban ■ Outer suburban

Situated in the north of Melbourne, the leafy Bundoora campus is home to many of RMIT's education, biomedical, health and science courses.

Malvern

Burwood

Glen Waverley

Chadstone

Clayton

Moorabbin

RMIT has three campuses and two sites in Australia, two campuses in Vietnam and a research and industry collaboration centre in Spain.

International locations

Vietnam

Study abroad at RMIT Vietnam and experience an unforgettable semester in Asia. Our urban Hanoi campus and clean, green Ho Chi Minh campus offer expansive study spaces and student environments.

Europe

Opportunities exist for students to engage with our European centre in Barcelona through study tours, internships and research, as well as online opportunities including industry projects, mentoring and guest lectures.

Accommodation

Purpose-built student accommodation

Want to live somewhere fully furnished, reasonably priced and with other students? RMIT has selected a number of student apartments, located close to the City, Bundoora and Brunswick campuses, that meet our quality standards.

Alternatively, if you'd like to have RMIT right on your doorstep, UniLodge at our Bundoora campus provides state-of-the-art student accommodation with a range of self-contained apartments or studios to choose from.

Many accommodation providers offer scholarships to help students with accommodation costs.

To view our recommended accommodation options and explore accommodation scholarships, visit rmit.edu.au/accommodation

Renting and sharing

You can rent a house, apartment or studio in Melbourne through a real estate agent or private rental provider. Here are just a few places to look for private rentals:

domain.com.au
realestate.com.au
realestateview.com.au
studentaccommodationone.com
view.com.au

Shared accommodation

Shared accommodation is a popular choice for students looking for reduced living expenses and the opportunity to meet new people.

Students looking for an existing household can find advertisements on shared accommodation websites, but it is important to inspect rooms and meet all the people you may be sharing with before moving in.

flatmatefinders.com.au
gayshare.com.au
realestate.com.au
sharehouses.com.au

Need help with housing?

Student Welfare Advisors at Student Connect can help you with:

- information on housing options that suit your budget
- advice on rental and tenancy issues
- information about moving in and out of your property
- advice on finances, housing, welfare and Centrelink
- referrals to support services

rmit.edu.au/support-housing

Moving to Melbourne

Once you've explored your accommodation options in Melbourne, you can start planning the rest of your move from interstate or overseas. RMIT has the resources you need to research Melbourne's cost of living, working arrangements, public transport, banking and the bustling city lifestyle.

accommodation options

Global experiences

RMIT has partnerships with more than 200 universities around the world. From international study opportunities to overseas work placements, you'll gain invaluable life and work experience through our network of partner nations.

Student exchange programs

Spend an unforgettable semester or two at one of RMIT's 200+ partner institutions.

Study tours

Join fellow students on a two to four-week trip to the Americas, Asia or Europe under the leadership of an RMIT academic.

Global leadership programs

Develop your own leadership style and enhance your cultural intelligence with a range of free programs offered in Melbourne and across Asia.

Study at RMIT Vietnam

Study at RMIT Vietnam's Ho Chi Minh City or Hanoi campuses for up to a year.

Study with RMIT in Asia

Study part of your degree at RMIT's joint teaching partners, including: Singapore Institute of Management, Shanghai University of International Business and Economics, Hong Kong Arts School and VTC Shape.

Industry experience

As an RMIT student, you can access work-integrated learning, volunteer opportunities, internships, leadership training and research programs around the world.

Life at RMIT

Uni is about so much more than just going to class. It's also about meeting friends, trying new things and making lifelong memories – and at RMIT, there are lots of ways to do that!

Discover 160+ student clubs

Whether you're after adventure, want to meet new people, build skills to complement your studies, or just pursue something you love, RMIT has a club or society to suit your style!
rmit.edu.au/students/student-life/clubs-societies

RMIT offers these clubs, and so many more...

- DJ Club
- Females in RMIT Engineering
- Futsal Club
- Hockey Club
- Indian Club
- Indonesian Student Association
- KPOP Club
- Literature Society
- Photography Club
- Student Band Society
- The RMIT Programming Club
- Yoga and Meditation Club

Make friends at RMIT

Starting uni and meeting new people can be daunting – but not with RMIT Kirrip. Kirrip is specifically designed to help students make friends at uni, and past activities have included cooking classes, group trips around Melbourne and even tickets to the AFL.
rmit.edu.au/students/student-life/make-friends

DID YOU KNOW?

'Kirrip' means 'friend' in the Woi wurrung language of the Wurundjeri people!

Join free weekly events on campus

From dance classes to job fairs, group yoga to esports tournaments, there's always events to look forward to at RMIT's vibrant campuses. Our students are no strangers to free lunchtime BBQs and DJ sets!
rmit.edu.au/students/student-life/events

Explore
life at RMIT

Take your sporting passion to the next level

Get active on the sporting field and in esports! Represent RMIT nationally in tournaments, join the gym on campus and discover services available to student athletes.

rmit.edu.au/students/student-life/sport-fitness

EARLY BIRD DISCOUNT

A **RUSU membership** gives students access to exclusive discounts, event invites and early-bird specials!

Become a member of the RMIT University Student Union (RUSU)

Run for students, by students, RUSU manages RMIT's clubs and organises fun events, such as end of exams parties and free breakfasts. RUSU also manages student community resources, such as welfare and student rights services.

Connect in creative spaces and communities

Creativity and storytelling are celebrated all over RMIT, from art installations that bring our campuses to life, to student-run magazines and proud collaborations with iconic institutions, including the Arts Centre Melbourne.

rmit.edu.au/students/student-life/creative

DID YOU KNOW?

RMIT's own cinema, **The Capitol Theatre**, offers exclusive discounts for movie-loving students!

Get future ready

Find a job, plan your career and check out all the opportunities for work and study at RMIT.

Career Connect

Career Connect is your drop-in service centre for all things career-related. Career Connect offers services such as:

- help finding and applying for casual, part-time and graduate jobs
- job interview preparation
- free résumé and cover letter workshops
- industry events and networking sessions
- one-on-one career consultation appointments
- subject or course advice

In 2024, Career Connect at RMIT was a finalist for the Most Popular Career Service by the Australian Association of Graduate Employers (AAGE) at the Graduate Recruitment Industry Awards (AGRIA).

rmit.edu.au/career-connect

RMIT Activator

Activator is RMIT's home of entrepreneurship. Its workshops, online learning and startup programs position participants to grow their ideas, launch their business venture, and make an impact.

At Activator, you can access mentors, attend masterclasses, request business coaching, apply for funding and learn the enterprise skills you need to support your ideas.

No matter what your future looks like, plug into Activator's ecosystem of entrepreneurs, intrapreneurs, startup founders and innovators and let it help you on your journey to success.

rmitactivator.edu.au

Experiential learning and RMIT Plus

Experiential learning at RMIT helps you gain essential skills for life and work. It can include activities such as student volunteering, micro-credentials and career mentoring, and involves lots of opportunities to experience personal growth, make friends and test out new hobbies and interests alongside your study.

If you've already got a clear idea of goals you want to achieve and the skills you'd like to develop, you can take your experiential learning a step further with RMIT Plus. This is a self-guided program where you can identify the areas you'd like to improve, create an action plan and monitor your progress at your own pace. Through RMIT Plus, you can also formalise your experiential learning by getting it added to your academic transcript!

rmit.edu.au/experiential-learning

Work-integrated learning (WIL)

WIL is an activity where you apply your academic learning in a real-life situation with an industry or community partner.

Higher education and vocational education students can complete a WIL activity, which is formally assessed for credit towards your qualification. The type of WIL activities you undertake will depend on your course and study discipline, and can occur on or off campus. They may be:

- work placements such as clinical placements, internships or field education or professional practices
- projects with industry and community-based organisations
- art projects with exhibitions

WIL simulations are activities where you practise using technology, equipment or activities that are not possible to complete in an industry setting, e.g. moot courts.

RMIT Activator Residency Program

Support services

RMIT's support services and networks are there to help you succeed at university, while ensuring you stay healthy and happy. They will support you through every step of your journey with RMIT.

Equitable learning and disability support

We aim to support and create equal opportunities for students with a disability, mental health condition, long-term illness and/or neurodivergence and neurological conditions to participate in their studies. Services provided may include study adjustments, assistive technology and enabling support staff (such as Auslan interpreters, notetakers, participation assistance and more).

rmit.edu.au/student-support-ELS

Counselling

Counselling at RMIT offers students a safe, friendly and confidential environment to seek help. Whether you're struggling with personal issues, mental health, or you just have something you want to talk through, we offer counselling in person or online.

rmit.edu.au/student-support-counselling

Financial assistance

Student Welfare Advisors at Student Connect can provide advice on a wide range of financial matters, including personal budgeting. You can also speak with them about one-off and short-term emergency support and financial assistance.

rmit.edu.au/students/support-services/financial-legalsupport/financial-welfare-advice

Safer Community

At RMIT, we are committed to providing a respectful and safe place to study. If you are feeling unsafe or unsure of what to do about threatening or unwanted behaviour, including sexual harassment or family violence, you can talk to a member of Safer Community about your concerns and options, even if the behaviour happened off campus.

rmit.edu.au/safercommunity
Email: safercommunity@rmit.edu.au or
call us: 03 9925 2396

SafeZone

Your safety is our priority at all times. To help you feel safe on campus, students can download SafeZone, a free app that is available for any smartphone. SafeZone allows you to instantly access support and help if you need it. It includes an emergency alert button, instant help calls to campus security and a first aid request button.

rmit.edu.au/safezone

Support for Aboriginal and/or Torres Strait Islander students

The Ngarara Willim Centre is a place at RMIT for Aboriginal and/or Torres Strait Islander students to engage with their education and to be supported and encouraged throughout their studies. The team offers ongoing guidance with study, living and cultural needs while you reach your potential.

rmit.edu.au/students/support-services/indigenous

Chaplaincy

The Chaplaincy provides compassionate help and spiritual support for all students, whatever their religious beliefs may be. We offer quiet spaces and a listening ear, and we welcome you to join us for one of our many multi-faith events.

rmit.edu.au/student-support-chaplaincy

Legal support

RMIT Student Legal Service offers free, confidential legal advice to students. We can advise on issues such as renting, employment, fines, criminal law, debts, motor vehicle accidents, your safety, your consumer rights and more.

rmit.edu.au/student-support-legal

Support for international students

International students are an important and valued part of the RMIT community. We offer lots of resources and support services to help international students settle in and make friends, including study and English language support, pre-departure checklists and on-campus events.

rmit.edu.au/students/support-services/international-students

Unscored VCE and VCE Vocational Major

Getting into university without an ATAR is possible. At RMIT, pathways and vocational study are great places to start.

Vocational study

Know roughly what you're interested in but don't have a specific degree in mind? Vocational study, sometimes known as TAFE, will help you transition into university while gaining hands-on skills.

Some of these courses may look at your ATAR as part of selection; however, those who have completed VCE VM or unscored VCE are eligible to apply.

Upon completion, vocational study can help you get qualified and employed or provide a pathway into further studies.

Pathways

Do you have a specific bachelor's degree in mind? You can get there by starting with a different qualification and then transferring.

Explore your options on page 18!

Levels of study explained

Start your uni journey in the right place!

Certificate II and pre-apprenticeships

A Certificate II, also known as a pre-apprenticeship, is designed to help you gain the practical experience to start a building or trades apprenticeship. If you choose to progress into a Certificate III, that's where you'll get fully qualified.

Certificates III and IV

Certificates are a great place to start gaining hands-on knowledge in your field. Through a certificate, you can gain job-ready skills in as little as six months. Certificates can also open pathways to further study at RMIT.

Vocational study

Apprenticeships and traineeships

Apprenticeships and traineeships combine training and employment. At RMIT they're available across many study areas, from textiles to building, at both the certificate and diploma levels of study.

Diplomas and advanced diplomas

Diplomas and advanced diplomas help you gain specialised knowledge to work in skilled or paraprofessional areas. Diplomas and advanced diplomas can also open pathways to further study at RMIT.

Early Offer program

Use your extracurricular experience to secure an early spot in your dream course at RMIT.

RMIT's Early Offer program considers your hobbies, weekend projects and interests alongside your ATAR.

From captaining your footy team to building your own website, your experience can enable you to be accepted into your course on a lower ATAR, taking some of the pressure off your final year at high school.

It's part of RMIT's commitment to diversity and equitable learning, and it means you'll get your conditional uni offer before your final exams.

**Explore
Early Offer program**

Associate degrees

An associate degree is a two-year course that provides a solid foundation of knowledge in your field. This type of degree can lead directly to employment or further study at RMIT.

Honours and professional practice degrees

Some bachelor's degrees have an additional year of study, known as honours or professional practice. Honours degrees involve advanced coursework, often in the form of a year-long research project, while professional practice degrees include a year of work placement.

Undergraduate study

Bachelor's degrees

A bachelor's degree typically takes three to four years to complete and gives you in-depth knowledge in your field. This type of degree is essential for many professional careers and is a prerequisite for postgraduate study.

Postgraduate study

After you complete your bachelor's, honours or professional practice degree, you may want to continue studying and gain highly specialised skills in your field.

Pathways

The traditional path to university isn't the only one. RMIT is the largest dual-sector university in Australia, and we offer lots of different ways to reach your dream degree.

How do pathways work?

Below is an example of how a vocational pathway might work for a student who hasn't met the entry requirements for their preferred course.

Sarah wants to become an entrepreneur. She has just completed Year 12, but her ATAR does not qualify her for entry into the Bachelor of Business and she did not meet the VCE English requirements.

To start a career as a practising professional in some areas, such as psychology, you're required to have both an honours/bachelor's degree and a postgraduate degree. RMIT offers pathways from your bachelor's or honours degree into master's degrees – just ask our **Study@RMIT** team how!

Information for parents and guardians

Preparing for university is an adjustment for the whole family. RMIT is committed to supporting parents and guardians through all the big decisions, exciting opportunities and proud moments.

Supporting your Year 9 or Year 10 child

Year 9 and 10 is when your child will start being exposed to their future study options. Their interests and strengths may become clearer as they consider VCE subject selection.

It's a great time to start thinking about:

- VCE subject selection, which generally occurs later in Year 10
- prerequisites, also known as the VCE subjects your child needs to complete to enter some courses
- the differences between high school and tertiary study

Supporting your Year 11 child

In Year 11, your child will start their VCE subjects, also known as VCE Units 1 and 2. This may be when they start obtaining the prerequisites they need for their future university course.

It's a great time to start thinking about:

- how ATARs, unscored VCE and VCE Vocational Major work
- the differences between tertiary study options, such as vocational and undergraduate courses
- how your child can get a head start at university through the RMIT Extension program

Supporting your Year 12 child

Year 12 is when your child completes their VCE, VCE Vocational Major, International Baccalaureate, or equivalent. It's normal for both of you to experience mixed emotions in their final year of schooling, but staying informed is the key to navigating big decisions together.

It's a great time to start thinking about:

- Pathways
- Change of Preference
- RMIT's Early Offer program, Schools Network Access Program and other alternative entry methods that could help your child get into their course with a lower ATAR
- RMIT's Equitable Learning Services for students with disabilities, long-term illnesses or mental health conditions
- your child's future career outcomes and industry experiences that can get them there
- any selection tasks your child will need to complete for their course

Join Open Day, school holiday campus tours and other events with your child and discover how to support their journey to university!

Upcoming events

Prerequisites ensure your child will be able to understand topics in their course at RMIT.

Knowing the prerequisites for a course can indicate whether it will suit your child's interests and strengths. For example, your child may want to become a teacher based on their passion for helping and leading others, but doesn't want to complete the VCE mathematics prerequisite for RMIT's education degrees. In this case, this is good encouragement for them to explore other areas such as youth work or psychology, or discover pathway options that don't require those prerequisites.

Information for international students under 18

International students under 18 years of age need to meet accommodation and welfare requirements as part of their student visas. Discover everything you need to know on RMIT's website, from visa requirements to the forms that you need to help your child fill out.

rmit.edu.au/international/under18

More information for parents and guardians

3,000+

scholarships awarded to our students in 2024 including:

1,550+

scholarships for financially disadvantaged students

400+

laptops for students in need

380+

scholarships for students with a long-term medical condition or disability

320+

scholarships for current or former refugees

280+

scholarships for students in specific disciplines

200+

scholarships for Indigenous students

130+

accommodation scholarships for students from rural, regional or interstate locations

Scholarships, access and equity

RMIT is committed to enriching and transforming the lives of our students. To make our courses more accessible to students of all backgrounds, we award more than 3,000 scholarships every year.

RMIT offers scholarships for:

- access and equity
- Aboriginal and Torres Strait Islander students
- asylum seeker students
- academic achievement
- discipline-specific learning
- accommodation
- travel
- international students

Learn more about RMIT's scholarship programs and how you can apply at rmit.edu.au/scholarships

Access and equity

RMIT Access and VTAC's Special Entry Access Scheme (SEAS) will take into consideration disadvantages and circumstances that may have impacted your academic performance.

Eligible applicants can receive an adjustment to the calculation of their selection rank, which can increase their chances of receiving an offer.

Check your eligibility at rmit.edu.au/equity-access

Schools Network Access Program (SNAP)

SNAP is RMIT's partnership with more than 200 Victorian secondary schools. It is designed to increase tertiary access by providing eligible students from partner schools with priority access to RMIT's certificate IV, diploma, advanced diploma, associate degree and degree courses.

Learn more and check eligibility requirements at rmit.edu.au/snap

Indigenous Access Program

The Indigenous Access Program is a priority access scheme that supports Aboriginal and Torres Strait Islander applicants through a non-ATAR and non-competitive selection process.

Read more at rmit.edu.au/indigenous-access

Explore our equity access schemes

Explore our scholarships

Fees

Associate, bachelor's and honours degree tuition fees

Commonwealth Supported Places (CSP)

A Commonwealth Supported Place (CSP) at university means your tuition fee is jointly paid by you and the Australian Government.

Your share of the fee (student contribution) is set by the government and determined by the discipline area (band) of your individual enrolled subjects, not the overall course.

rmit.edu.au/fees-local

The below table indicates what your annual fee would be for a commencing enrolled student in a full-time study load in 2025 (if you enrolled in subjects from a single band).

Student contribution band by subject	Maximum annual student contribution amount (per EFTSL) in 2025
Education, Postgraduate Clinical Psychology, English, Mathematics, Statistics, Nursing, Indigenous and Foreign Languages, Agriculture	\$4,627 per standard year \$578 per standard (12 credit point) subject
Allied Health, Other Health, Built Environment, Computing, Visual and Performing Arts, Professional Pathway Psychology, Professional Pathway Social Work, Engineering, Surveying, Environmental Studies, Science, Pathology	\$9,314 per standard year \$1,164 per standard (12 credit point) subject
Dentistry, Medicine, Veterinary Science	\$13,241 per standard year \$1,655 per standard (12 credit point) subject
Law, Accounting, Administration, Economics, Commerce, Communications, Society and Culture	\$16,992 per standard year \$2,124 per standard (12 credit point) subject

Certificate, diploma and advanced diploma tuition fees

If you enrol in one of RMIT's vocational qualifications, how much you'll pay will depend on whether you're offered a Victorian Government subsidised place or a full-fee paying place.

Subsidised places

You will be offered a government-subsidised place if you meet the eligibility criteria based on your citizenship, age, state of residence and educational history.

Free TAFE

RMIT offers certificates and diplomas that are part of the Victorian Government's Free TAFE program, featuring no tuition fees for eligible students.

rmit.edu.au/free-tafe

Full-fee places

If you don't meet the criteria for a government-subsidised place, you'll be offered a full-fee place.

Fee concession

The government subsidises student fees in select qualifications. If you meet the eligibility criteria, you may be able to access a 'fee concession'.

rmit.edu.au/programs/fees/vocational

VET student loans

RMIT students enrolled in approved qualifications at the diploma level or above can access the Australian Government's VET student loan program for fee support.

For more information and to check your eligibility, visit dewr.gov.au/vet-student-loans

Fees for international students

Are you an international student?

Find out your tuition fees through our database and explore scholarships at RMIT that help ease study costs and expenses.

rmit.edu.au/international/fees

On this page, we have used the following terminology:

- Course = Overall qualification (e.g. Bachelor of Science)
- Subject = Individual Unit (e.g. Chemistry Fundamentals CHEM1313)

Note that other material at RMIT (including application/enrolment systems and some websites linked in this guide) may use different terminology, such as:

- Program = Overall qualification (e.g. Bachelor of Science)
- Course = Individual Unit (e.g. Chemistry Fundamentals CHEM1313)

If you have any questions about the terminology or need clarification before lodging your application, please contact Study@RMIT for assistance.

Architecture

Take risks, engage with new technologies and explore design innovations through architecture, landscape architecture and interior design.

At RMIT, you'll develop a rich understanding of design through project-based learning. You'll build diverse skills to use throughout your career, including visual communication, drawing, 2D and 3D design, and problem-solving.

Study at Australia's top architecture school

RMIT is ranked #1 in Australia and #21 in the world for studies in Architecture and the Built Environment.¹

Learn from award-winning architects

We are renowned for longstanding connections with industry through our teaching staff, many of whom are award-winning architects, landscape architects and interior designers.

Start designing from day one

You'll learn in hands-on workshops and build industry experience, with design studios offered by leading local and international design practices.

Career outcomes

Architecture*

- Architectural designer
- Architectural draftsperson
- Designer and fabrication consultant
- Production designer
- Researcher

* Students must complete the Master of Architecture to be eligible to apply for accreditation as an architect

** Students must complete the Master of Landscape Architecture to be eligible to apply for accreditation as a landscape architect

Interior design

- Architectural designer
- Architectural draftsperson
- Designer and fabrication consultant
- Production designer
- Researcher

Landscape architecture**

- Ecological designer
- Garden designer
- Landscape architectural designer
- Landscape project manager
- Landscape technician

Architecture

Bachelor of Architectural Design

Acknowledged by the national and international architectural profession, this bachelor's degree is designed to help you develop a rich understanding of architecture. You'll learn from internationally recognised and award-winning architects in real-world projects, and build a diverse set of skills that will carry you through your career.

Pathway options

- **Adv Dip** of Building Design (Architectural) (2 years) plus **Bachelor of Architectural Design** (additional 2 years) = 4 years' total study. Entry into the **Bachelor of Architectural Design** is competitive and completion of the **Adv Dip** pathway program guarantees an interview.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

Interior design

Bachelor of Interior Design (Honours)

In this ideas-led design degree, you will focus on the dynamic relationship between people and the environment, exploring the potential and future of interior design as a practice. Different interiors are considered, including architectural, retail, exhibition and urban environments; digital and filmic spaces; performance and theatre design; art installations; and more.

Guaranteed pathways

- **Assoc Deg** in Interior Decoration and Design (2 years) plus **Bachelor of Interior Design (Honours)** – BH115 (additional 3 years for Semester 1 entry) = 5 years' total study
- **Adv Dip** of Building Design (Architectural) (2 years) plus **Bachelor of Interior Design (Honours)** – BH115 (additional 3 years for Semester 1 entry) = 5 years' total study

Other pathways

- **Dip** of Interior Design (2 years) plus **Bachelor of Interior Design (Honours)** – BH115 (additional 3 years for Semester 1 entry) = 5 years' total study
- **Dip** of Interior Design (2 years) plus **Assoc Deg** in Interior Decoration and Design (additional 1 year) plus **Bachelor of Interior Design (Honours)** – BH115 (additional 3 years for Semester 1 entry) = 6 years' total study

Prerequisites

Art

Hone your creative practice in Australia's leading art and photography school.

At RMIT, you'll learn in studios and facilities designed to support, challenge and expand your creative works. You'll graduate with the skills to be an active, independent and critically informed artist or photographer, with specialisations available in ceramics, drawing, print, photography, sculpture, painting, video and sound, and gold and silversmithing.

Study at Australia's top art school

RMIT is ranked #1 in Australia and #26 in the world for studies in Art and Design.¹ Our School of Art is led by accomplished professionals who are bold in their approach and strive to operate at the cutting edge of research and innovation.

Gain experience and showcase your art

We own and operate five public galleries and exhibition spaces that provide formal opportunities for you to integrate hands-on experience into your studies and showcase your work to a diverse audience.

Learn around the world

We run regular study tours to experience festivals and meet prominent artists in New York, Chicago, Nepal, Japan, Arles, Hong Kong and Bologna. Students are also given the opportunity to study at our interlocation partner, Hong Kong Art School, where RMIT delivers its fine art degrees.

Career outcomes

Art

- Arts manager
- Art technician
- Arts writer
- Curator
- Filmmaker
- Gallery director
- Professional artist
- Sound engineer

Aviation

Launch a career in aviation at RMIT. Study in one of our two aviation centres where you'll develop skills and experience using cutting-edge technology and equipment.

Throughout your studies, you'll develop the knowledge and skills you need to apply for a recreational pilot licence (RPL), a private pilot licence (PPL) and an air transport pilot licence (ATPL).

Join a renowned flight school

RMIT has the largest university-owned aircraft fleet in Australia. We've also trained more than 3,000 pilots since 1994, and we have more than 80 years of involvement in aerospace and aviation education.

Learn in facilities that prepare you for the job

We conduct flight training at our Bendigo and Point Cook aviation centres. Point Cook is the oldest operating airfield in the world and the birthplace of the Royal Australian Air Force.

Gain experience from industry leaders

The Qantas Group – Aviation Career Enrichment Program connects selected students with experienced pilots during their degree. This enriches your studies with direct industry mentoring and networking opportunities.

Career outcomes

Flight training

- Air-work or agricultural operations
- Beach patrols
- Charter and freight operation
- Chief pilot
- Emergency services
- Fleet manager
- Flight operations manager or inspector
- Flight training organisations
- Major and regional airlines
- Seasonal bushfire spotting

Biomedical Sciences

Create practical solutions to global health issues and develop a strong understanding of the role that technology plays in how our bodies function.

In selected biomedical sciences degrees, you can also try a mix of electives before you decide how you'd like to specialise, and shape your degree around your interests.

Launch your career with practical experience

RMIT's biomedical sciences degrees include work placements during third and fourth years. Past students have been placed at major hospitals, including Royal Children's, Peter MacCallum and medical facilities, as well as in private laboratories.

Study in cutting-edge facilities

The award-winning \$32-million biosciences building at our Bundoora campus is at the centre of our biomedical science courses. You'll get hands-on with equipment such as our 3D anatomy visualisation and virtual dissection tool.

Learn around the world

Laboratory medicine provides opportunities for students to travel overseas and undertake up to 10 weeks of professional practice in an approved lab across countries such as the UK, the US, Ireland, Singapore, Korea and Sweden.

Building

Lay the foundations of your new career in building and trades, construction management or urban planning at RMIT.

Our building courses connect you with industry mentors who will give you the professional skills required to design, shape, finance and manage the urban spaces of the future.

Learn from hundreds of industry partners

RMIT's property, construction and project management courses maintain relationships with more than 250 industry partners through our Employer of Choice program.

Choose an accredited, job-ready course

Our courses are accredited by major industry associations, including the Australian Institute of Building.

Learn in industry-grade facilities

Many vocational building courses are taught in the Trades Innovation Centre, a 1,700 square metre facility that gives students a taste of what it's like to work on a real construction site.

Career outcomes

Building and trades

- Air-conditioning mechanic
- Building and construction labourer
- Building and construction supervisor or manager
- Contracts administrator
- Electrician
- Estimator
- Plumber
- Refrigeration mechanic

Construction and project management

- Construction manager
- Project manager
- Quantity surveyor
- Site manager

Surveying and geospatial sciences

- Construction project surveyor
- Licensed cadastral surveyor
- Remote sensing analyst

Urban planning

- Ecological designer
- Garden designer
- Landscape architectural designer
- Landscape project manager
- Landscape technician

Building and trades

Bachelor of Construction Management (Honours)

Learn to manage contractors, budgets and stakeholders to deliver construction projects from start to finish. In your fourth year, you'll complete a capstone project in a realistic simulated environment, alongside a research project and thesis. Graduates have the skills to work in a variety of roles, including construction and project management, chartered building and surveying, and more.

Guaranteed pathways

- **Adv Dip of Building Design (Architectural)** (2 years) plus **Bachelor of Construction Management (Honours)** (additional 2.5 years) = 4.5 years' total study
- **Dip of Building and Construction (Building)** (2 years) plus **Bachelor of Construction Management (Honours)** (additional 3 years) = 5 years' total study

Other pathways

- **Dip of Project Management** (1 year) plus **Bachelor of Construction Management (Honours)** – BH114 (additional 3.5 years for Semester 1 entry) = 4.5 years' total study

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

VCE Units 3 and 4 – a study score of at least 20 in any Mathematics.

Cyber Security Law and Governance

Gain an understanding of cyber security's legal and governance aspects, and build the skills to navigate and manage the complex regulatory and legal issues related to data protection, privacy and cyber threats. You'll emerge with skills for risk management, compliance and governance roles in various sectors.

International Business

Deepen a crucial understanding of international business in an increasingly globalised world. In this major, you'll explore the complexities of conducting business in different international markets and gain skills for roles that involve international market analysis, foreign investment decisions and managing multinational businesses.

Marketing Technology

Discover how digital technologies have revolutionised marketing practices. This major equips you with the knowledge of various marketing technologies and digital tools used in today's industry, preparing you for digital marketing, marketing technology (MarTech) and content marketing roles.

Enterprise AI and Business Analytics

Leverage AI and analytics tools to make data-driven decisions, solve business problems, optimise operational efficiency, and create strategic advantages. Gain hands-on experience with cutting-edge AI tools and techniques, equipping you with the skills needed to excel in a rapidly evolving business landscape.

Leadership and Strategy

Develop the skills to lead strategically with your authentic voice. In this major, you'll navigate complex and adaptive challenges, foster innovation, drive sustainable growth, and cultivate high-performing, ethical and inclusive workplaces.

Quantitative Economics and Finance

Develop strong quantitative skills that can be applied to economics and finance. This major will teach you to analyse economic data, understand financial markets and make informed financial decisions. It prepares students for financial analysis, economic forecasting, risk management or investment banking roles.

Communication

Write your own future with an industry-connected communication course based in RMIT's Media Precinct and publishing houses.

Whether you're interested in writing news stories, covering high-profile events, running ad campaigns or expanding your skills and experience in creative writing and publishing, you'll graduate with the means to work across the media landscape.

Study at a top-ranked university

RMIT is ranked #4 in Australia for Communication and Media Studies.¹ We have been teaching journalism for more than 50 years.

Gain experience from industry leaders

You'll work with industry during placements, collaborative projects and research. Past students have worked with organisations such as ACMI, SBS Radio, Ogilvy and the Emerging Writers' Festival.

Learn around the world

Our communication students have gained international industry experience in exciting locations such as North America and the UK.

Majors and Minors in the Bachelor of Professional Communication

At RMIT, we've created an extensive range of career-focused areas of study (majors and minors), which allow you to customise your degree and gain an edge in the areas you're most interested in.

Put simply, a major is a primary focus for your study and a minor is a secondary focus.

Majors

When you study the Bachelor of Professional Communication, you will have the option to undertake majors in **Advertising**, **Digital Communication** and/or **Public Relations** to hone your expertise or expand your knowledge with a selection of up to three four-course minors in a range of communication, media, business and creative disciplines.

Minors

Advertising

Acquire industry-relevant creative and strategic skills while gaining an understanding of advertising in the broader context of communication and marketing practice. Learn about advertising's pivotal role in driving brand awareness, influencing consumer perceptions and achieving business objectives.

Asian Media and Culture

Asia's diverse cultures, politics and societies are among the world's most vibrant, dynamic and complex. Deepen your understanding of the rise of Asia, the impact of digital media on mobility and popular culture, and the interrelation of gender and social change.

Cinema Studies

Cinema Studies uses film as a lens to illuminate history, culture, contemporary society, technology and the medium itself. Students develop essential skills in audiovisual analysis and critical thinking, arriving at understandings of cinema texts and cultures in a global context.

Digital Communication

Create engaging content, collect and analyse data, develop digital and social media skills, and understand the rapidly changing digital media landscape. Prepare yourself for a variety of communication roles with the flexibility to work in any industry sector.

Gender Studies

Understandings of gender, sex and sexuality are central to contemporary life, and more complex and contested than ever. Develop language and contexts for reading and analysing our world in your professional, political and everyday lives.

Law and Emerging Technology

Develop specialist knowledge and skills related to the laws and policies that govern the digital media environment including in intellectual property, artificial intelligence and blockchain.

Marketing

Become prepared to take on roles in fields such as digital marketing, brand management, campaign strategy and customer analytics.

Photography

Learn from practising photographers, artists and leading academics in purpose-built studios using modern photographic equipment and specialist software.

Approaches to Popular Culture

Examine different pop culture environments, social trends and histories from celebrity, screen and music culture to new and old forms of technology.

Business and Technology

Digital technology is completely changing the world of business. Learn how by studying topics such as cyber security, fintech and managing in digital contexts.

Contemporary Politics and Communication

Investigate big questions – decarbonising economies, audience democracy, turmoil in political journalism, the housing crisis and the Voice, automation and how we govern ourselves at work – while staying focused on the communication angle.

Entrepreneurship

Discover the ideas and strategies of some of Australia's new and established entrepreneurs. Gain the confidence and entrepreneurial skills to launch and manage exciting business ventures.

Journalism

Build practical journalism skills required for a contemporary or allied journalism career. Using RMIT's world-class facilities, you'll address practical and theoretical aspects of journalism, including reporting and writing, ethics, law, podcasting and photography.

Literary Studies

Explore and examine the ways language and imagination combine to create exemplary literary works reflecting real-world concerns – from short stories to novels, poems, plays and film, to non-fiction, lyric and critical essays.

Media

Blend practical skills with creativity so you can build the knowledge needed to work across film, television, radio, social and digital media. You will produce innovative and compelling content across a wide range of existing and emerging media platforms.

Public Relations

Prepare for the fast-evolving landscape of corporate, government, non-profit and consulting sectors. Public relations is for enquiring minds – you'll develop expertise in strengthening relationships, boosting reputation, and adeptly conveying organisational messages to diverse audiences.

“

I liked the idea of having a specialised communications degree. RMIT is well-known for having [some of] the best communications courses in Australia, so it was of course my first pick for public relations.

My course at RMIT gave me the skills to work with clients, write copy and produce ethical strategy for large and small companies.

Ellen Weigall
Communication
(Public Relations) alum

Design

Reimagine the future, push the boundaries of design and immerse yourself in hands-on studio learning.

You'll learn from local and international practising designers, lecturers and academics who are connected with industry and the design community, and graduate as a highly trained designer and visual problem solver.

Study at Australia's top design school

At RMIT you'll investigate the contemporary, cultural and environmental aspects of design and technology at a world-class level. RMIT is ranked #1 in Australia and #26 in the world for studies in Art and Design.¹

Learn alongside industry leaders

Work on client projects and pursue internships with organisations such as Australia Post, National Gallery of Victoria, ACMI and more.

Kickstart your global career

Discover our exchange partnerships with prestigious universities, including the Parsons School of Design in New York City.

Education

Teach the next generation with an education qualification.

At RMIT, you'll learn from industry leaders, partner with peer mentors and build experience with your future employers. No matter what teaching discipline you choose, you'll graduate with the ability to shape tomorrow's minds and foster a lifelong love of learning.

Gain real-world experience

RMIT education students complete up to 80 days of work-based learning through supervised local and international placements, including opportunities to teach in disability settings and remote communities.

Take your learning beyond the classroom

Aside from traditional educational settings, our education graduates have the skills, knowledge and experience to work in a number of non-teaching fields, such as educational policy, career development and community services.

Choose an accredited degree

Our Bachelor of Education is accredited by the Victorian Institute of Teaching. The Primary and Early Childhood stream is also accredited by the Australian Children's Education and Care Quality Authority.

Career outcomes

Teacher education

- Early childhood teacher
- Early learning centre manager
- Education teacher
- Primary school teacher
- Secondary school teacher

Training and assessment

- Enterprise assessor
- Enterprise trainer
- Registered training organisation trainer
- VET in VCE or VCE VM secondary school teacher
- Vocational education teacher

Engineering

Innovate solutions to tomorrow's challenges.

At RMIT you'll gain the professional knowledge needed to combine creativity and technical skills in engineering. There are many career paths for an engineer and at RMIT, you'll develop internationally recognised skills in the areas that interest you most – designing and creating products, systems, structures and services that transform the world and improve lives.

Study at a top-ranked university

RMIT is ranked among the top 10 universities in Australia for Civil and Structural Engineering, Chemical Engineering, Electrical and Electronic Engineering, and Mechanical Engineering.¹

Shape your degree around your interests

In our engineering degrees, you can try a mix of electives before you decide how you'd like to specialise. You can combine your engineering major with cross disciplinary minors or choose a double-degree option.

Choose an accredited degree

Our engineering qualifications are designed in accordance with the Australian Qualifications Framework and most are accredited through Engineers Australia.

Career outcomes

Aerospace engineering

- Aerospace engineer
- Aircraft designer
- Air safety officer
- Production planner
- Systems technician

Biomedical engineering

- Biotechnology
- Defence
- Hospitals (servicing and optimising equipment)
- Implant engineering
- Medical device manufacturing
- Nanotechnology
- Start-up companies

Chemical engineering

- Chemical engineer
- Cosmetic developer
- Mineral and metallurgical engineer
- Petrochemical researcher
- Plastic and polymer engineer

Civil engineering

- Design engineer
- Engineering asset manager
- Infrastructure manager
- Project manager
- Structural engineer

Computer engineering

- Chief technology officer
- Computer engineer
- Network designer
- Systems architect

Electrical and electronic engineering

- Electronic designer
- Microprocessor programmer
- Power systems engineer
- Service engineer

Environmental engineering

- Air pollution control engineer
- Environmental engineer – contaminated land
- Environmental engineer – land and groundwater
- Environmental engineer – mine closure
- Environmental engineer – renewable energy
- Environmental hydrogeologist
- Environmental scientist

Mechanical engineering

- Transport engineer
- Power generation engineer
- Mechanical systems engineer
- HVAC engineer

Mechatronics and manufacturing engineering

- Automation specialist
- Engineering specialist
- Facilities manager
- Process engineer
- Product design engineer
- Production manager
- Quality engineer

What kind of engineer are you?

For more information, visit rmit.edu.au/engineering

Engineering with options

Bachelor of Engineering (Honours)

Know you want to be an engineer but not sure what specialised degree you're interested in? Spend your first year of study experiencing the breadth of engineering options available at RMIT before choosing your specialisation in second year with a strong technical foundation.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

VCE Units 3 and 4 – a study score of at least 20 in one of Maths: General Mathematics, Maths: Mathematical Methods or Maths: Specialist Mathematics.

VTAC 32003310711

Associate Degree in Engineering Technology

Accredited by Engineers Australia, this associate degree provides a flexible pathway to an engineering degree. In first year, you'll learn the fundamental principles of engineering before choosing one of six specialisations for second year: mechanical, aerospace, advanced manufacturing and mechatronics, electrical and electronics, computer and network, or civil engineering.

Prerequisites

VCE Units 3 and 4 – a study score of at least 20 in English other than EAL or at least 23 in English as an Additional Language (EAL).

VCE Units 3 and 4 – a study score of at least 20 in one of Maths: General Mathematics, Maths: Mathematical Methods or Maths: Specialist Mathematics.

Advanced manufacturing and mechatronics

Bachelor of Engineering (Advanced Manufacturing and Mechatronics) (Honours)

Get prepared for a design and manufacturing career with a bachelor's degree focused on mechatronics system design, automation, manufacturing management and advanced materials. This professionally accredited degree features a capstone project in fourth year. You'll graduate prepared to work in a wide range of industries, including automotive, aerospace, food and beverage, and engineering and management consultancies.

This course is taught predominantly at the City campus. Students may have to travel to the Bundoora campus for laboratory, WIL and/or capstone project work.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

VCE Units 3 and 4 – a study score of at least 20 in one of Maths: General Mathematics, Maths: Mathematical Methods or Maths: Specialist Mathematics.

Choose your specialisation in the Bachelor of Engineering (Honours)

Interested in engineering but not sure where to begin? RMIT's Bachelor of Engineering (Honours) empowers you to build a foundation in broad engineering principles before you find your specialisation.

In your first year, you'll be exposed to the fundamentals of engineering through science, mathematics, engineering design and professional practice skills. You will also take several electives to help you decide which stream of engineering to specialise in from your second to fourth years of the degree.

After your first year of study, you'll have the opportunity to choose one of the engineering specialisations below.

Choose your engineering specialisation

Aerospace Engineering

Build highly specialised analytical, technical and design skills required to pursue an exciting career in aeronautics and astronautics. Design aircraft and spacecraft, develop propulsion systems, research new materials, test new engines, develop rockets and plan maintenance subjects.

Chemical Engineering

Immerse yourself in the role of technology in science and design creative solutions to global issues. Learn to improve industrial processes such as water purification, food production and processing, or to develop products such as cosmetics or pharmaceuticals.

Electrical Engineering

Find better ways to power the world. Understand the production and distribution of electricity, develop advanced technical skills and focus on areas such as energy conversion, power systems, renewable energy, high-voltage equipment and control engineering.

Environmental Engineering

Solve critical global challenges with specialist study in land contamination, water and air pollution, energy, sustainable cities, and more.

Advanced Manufacturing and Mechatronics Engineering

Learn about mechatronics, robotics, advanced materials, automated systems, and the simulation and modelling of manufacturing processes.

Biomedical Engineering

Play a vital role in the evolution of healthcare and the development of technology that supports it, including assistive technologies and biomaterials.

Civil and Infrastructure Engineering

Discover how civil and infrastructure engineering shapes our world. Developed with an environmental sustainability focus, this specialisation will teach you to plan, design, construct, supervise, manage and maintain infrastructure projects in Australia and overseas.

Electronic and Computer Systems Engineering

Study everything from digital electronics to image processing to instrumentation, and realise electrical and electronic and computer systems engineering's vital role in society.

Mechanical Engineering

Discover the vast discipline of mechanical engineering and explore computer-aided design, renewable energy, mechatronics and more.

Software Engineering

Explore engineering methods and practices for designing, developing, and maintaining software and embedded systems, while also covering technology management.

Environment

Discover ways to protect our precious ecosystems, rethink approaches to urban development, and find sustainable solutions to our world's most imminent environmental challenges.

With an industry-backed environment qualification from RMIT, you'll make a difference in a wide range of careers that positively impact the future.

Choose a university committed to change

RMIT is ranked among the top five universities in Australia for sustainability impact.¹ We are committed to fostering initiatives and partners that advance sustainability on a global scale.

Learn alongside industry leaders

Our students learn by getting hands-on experience in fieldwork and placements. Previous students have worked with organisations such as CSIRO, Parks Victoria and Melbourne Water.

Shape your degree around your interests

In our environmental science degrees, you can try a mix of electives in your first semester before you decide how you'd like to specialise.

Career outcomes

Environmental science

- Environmental impact assessor
- Environmental manager
- Environmental policy developer
- Environmental scientist
- Natural resource manager
- Site remediator
- Sustainability consultant
- Waste management officer

For more information, visit
rmit.edu.au/environment

Environment

Bachelor of Environmental Science

Understand the evaluation and management of the environment. Gain extensive hands-on experience with equipment in the laboratory and in the field. This degree prepares you for a career in government, resource management, research, education and consulting.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

Fashion

Design a portfolio of work to help launch your career in the fashion industry with RMIT's internationally recognised fashion courses.

Our courses are led by designers who will help you develop your identity as a creative. You'll graduate with the entrepreneurial skills to thrive in the competitive fashion industry, including designing, textile development, merchandising and marketing.

Study at our Brunswick campus

Learn from the best at RMIT's creative campus, located in the vibrant Design District of Brunswick. Our campus is equipped with specialist facilities – from studios, print rooms and showcase spaces to our \$8 million Fashion Hub.

See your work on the runway

Previous RMIT fashion students have worked alongside brands such as Myer and Disney, and displayed their work at the Melbourne Fashion Festival and London Graduate Fashion Week.

Learn around the world

We offer exchange partnerships with top fashion schools such as the Parsons School of Design in New York City.

Career outcomes

Fashion and textiles

- Creative director
- Creative pattern-maker
- Digital content creator
- Fashion, accessories, costume, material or colour designer
- Fashion events producer
- Stylist

Sustainable innovation

- Corporate social responsibility manager
- Digital fashion innovator
- Fashion or textile technologist
- Fashion sustainability compliance officer
- Materials designer researcher
- Product developer
- Sustainable sourcing manager

Enterprise

- Brand manager
- Fashion business manager
- Fashion buyer or range planner
- Fashion merchandise planner
- Fashion retail and ecommerce manager
- Fashion sourcing or logistics manager
- Fashion trend analyst
- Product manager

Merchandising

- Buying assistant
- Ecommerce supervisor
- Retail operations
- Visual merchandiser

Fashion and textiles

Bachelor of Fashion (Design)

Highly regarded by the international fashion community, this degree challenges the boundaries of fashion. As a student, you'll gain the skills and knowledge to formulate your voice as a designer, while being encouraged to create ethical design propositions and use cross-disciplinary strategies to drive global and competitive practice. With the choice of a minor specialisation in textiles and material design, enterprise or sustainable innovation, you can customise your studies according to your interests and career goals. You could also participate in national and international showcases, events and exhibitions.

Pathway options

- **Assoc Deg** in Fashion (major in Design and Technology) (2 years) plus **Bachelor of Fashion (Design)** (additional 1.5 years) = 3.5 years' total study. Entry into the **Bachelor of Fashion (Design)** is competitive.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

Health

Make a positive difference in people's lives, pursue a rewarding career and help find solutions to global health problems.

RMIT's health courses are developed in consultation with practising professionals and many offer industry placements, student clinics and work experience in Australia and overseas. You'll graduate with the skills to pursue essential roles in pharmacies and laboratories, dentistry practices, hospitals, aged care facilities and more.

Get clinical training on campus

RMIT's registered Health Clinic in Bundoora is open to the public and helps students gain experience for independent practice.

Study in cutting-edge facilities

You'll study in industry-grade facilities that will immerse you in the world of health care. RMIT's health facilities include a remedial and myotherapy clinic, nursing wards, the Digital Human Biosciences Facility and many more.

Shape your degree around your interests

In our health degrees, you can try a mix of electives before you decide how you'd like to specialise, or combine your health major with versatile minors in the health industry.

Career outcomes

Complementary medicine

- Myotherapist
- Osteopath

Dental studies

- Dental assistant
- Dental prosthetist

Law

Prepare for cases in the evolving legal system and make your mark in the field of law.

In law and justice at RMIT, you'll learn how criminal justice systems work to serve individuals and the community through law enforcement, policy, practice and reform. You'll also be able to explore all perspectives of the legal system, including business, policy, politics, sociology and criminology in contemporary Australia and beyond.

Gain real-world experience

Many of RMIT's justice and legal courses offer an internship elective, and some programs include placements of up to 50 days. Past students have completed placements or internships with organisations such as Victoria Police.

Join RMIT's Law Students' Society

Our Law Students' Society runs social, educational and career-focused events year-round, from mooting competitions to networking groups.

Explore electives in justice and criminology

Discover new passions and deepen existing interests with electives such as forensic studies, youth justice and international policing.

Psychology

Provide support and make a positive impact in people's lives with an RMIT psychology qualification.

You'll graduate with the ability to specialise in a diverse range of fields, including counselling, sport psychology, educational psychology, organisational psychology and forensic psychology.

Study an accredited degree

Several of RMIT's psychology degrees are accredited by the Australian Psychology Accreditation Council (APAC) and can lead to national and international registration as a psychologist.

Gain real-world experience

In addition to evidence-based learning material, you'll have access to up to 132 days of industry placement in real-world settings. You'll gain experience in settings such as hospitals, clinics or justice organisations – all before you've graduated.

Shape your degree around your interests

In our Bachelor of Psychology, you can try a mix of electives before you decide how you'd like to specialise.

Career outcomes

Psychology

- Counsellor
- Disability worker
- Human resources manager
- Organisational behaviour specialist
- Social policy officer
- Social psychologist
- Social researcher
- Welfare service officer

For more information, visit
rmit.edu.au/psychology

Psychology

Bachelor of Criminology and Psychology

This combination of an accredited psychology major with an applied criminology major prepares you to become a frontline justice worker. You will develop an understanding of the psychology of crime, be able to conduct forensic interviews and provide case management for offenders, victims and clients with complex needs.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

ATAR

60.20

VTAC 3200333651

Bachelor of Psychology

In this degree, you'll study the science of human behaviour and learn to apply this knowledge to make a difference in people's lives. You will explore topics such as perception and consciousness, theories of learning, memory, cognition, emotion, motivation and stress. In third year, you will also have the choice of a psychology placement or working on a psychology research project. This degree is a great pathway to postgraduate studies in clinical psychology, psychological research and registration as a psychologist.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

- **Dip** in Health Sciences (1 year) plus **Bachelor of Psychology** (additional 3 years) = 4 years' total study

Bachelor of Social Science (Psychology)

The combination of a social science degree with an accredited psychology specialisation is ideal for those interested in the interaction between individuals and the world around them. You'll gain foundational skills in your first year before tailoring the degree to your desired specialisation. In third year, you will complete a 35-day placement, giving you the opportunity to put your skills into practice and meet potential future employers. This degree functions as a first step to national and international registration as a psychologist.

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

Science

Explore the marvels and principles of science at RMIT, from monitoring the spread of infectious diseases to exploring the vast reaches of space.

Whether you're interested in studying mathematics, data, food technology, nanotechnology or spectrometry, you'll find your niche and build a skillset that prepares you to innovate in STEM.

Study at a top-ranked university

RMIT is ranked among the top 10 universities in Australia for Materials Sciences, Geography, Mathematics, Physics and Astronomy.¹ You'll learn in cutting-edge facilities, including an award-winning \$32-million biosciences facility.

Go beyond the classroom

You'll have the chance to put theory into practice through local field trips, mapping the environment, exploring the aquatic environment, and even going overseas to tackle environmental challenges in other countries.

Shape your degree around your interests

In our science degrees, you can try a mix of electives before you decide how you'd like to specialise. You can combine your science major with cross-disciplinary minors, study a double major, or choose from our standalone specialist degrees.

Career outcomes

Applied science

- Diagnostic technician
- Materials chemist
- Molecular gastronomist
- Nuclear physicist
- Scientist

Biotechnology and biological sciences

- Biotechnologist
- Cancer researcher
- IVF technician

Chemistry

- Advanced materials scientist
- Analytical chemist
- Chemical engineer

Food science and technology

Bachelor of Food Technology and Nutrition

Learn the science of large-scale food manufacturing and how to apply nutrition to food product standards. As part of your studies, you will have the opportunity to major in food technology, nutrition or both. From the food science and technology major, you may go to work for large food processing companies in research and development, marketing or quality assurance roles. Graduates of the nutrition science major work in community nutrition or for food companies in areas such as product development and regulatory affairs.

Majors and Minors in the Bachelor of Science

At RMIT, we've created an extensive range of career-focused areas of study (majors and minors) that allow you to customise your degree and gain an edge in the areas you're most interested in.

Put simply, a major is a primary focus for your study and a minor is a secondary focus.

As a student in the Bachelor of Science, you will have the opportunity to focus your studies on a single major complemented with a related generalist and advanced minors, or to select a second major and graduate from your degree with a double major.

Majors	
Biological Sciences Study life in all its forms – from molecules to ecosystems. Gain practical lab and field skills, specialising in environmental biology and ecosystems or biotechnology.	Biotechnology Investigate global biotechnology challenges, including human health, the adaptation of animals and plants, the changing climate and environment, food shortage and renewable energy production.
Chemistry Gain the lab practice and industry experience to lead innovation in industrial chemistry, functional materials and nanotechnology, medicinal chemistry or environmental chemistry.	Food Science and Technology Leverage our strong links with major food industry companies and well-equipped labs to build up your practical experience in food science.
Geospatial Science Experiment with the latest technologies and infrastructures available to build skills in the analysis, management, capture and visualisation of spatial information.	Mathematics Solve problems, link theory to practice, think logically and identify similar patterns in a variety of applications and contexts.
Nutrition Science Gain insights such as optimal growth and development, health and vitality, and prevention of chronic diseases. Build skills to address global challenges such as malnutrition, obesity and food insecurity.	Physics Combine the theoretical with the practical, exploring studies in chemical and quantum physics, atomic and molecular modelling, materials sciences, geophysics, optics and medical physics.
Statistics Discover the study of data, from collection to visualisation, analysis and interpretation. Learn to think logically, approaching theoretical and real-world problems in analytical and creative ways.	

Generalist minors	Specialist minors
■ Biosciences ■ Chemistry ■ Environmental Science ■ Food Science ■ Foundations of Sustainability ■ Foundations of Teaching ■ Geospatial Science ■ Mathematics ■ Nutrition Science ■ Physics ■ Statistics	■ Advanced Chemistry ■ Advanced Geospatial Studies ■ Advanced Geospatial Systems ■ Advanced Physics ■ Biodiversity and Ecology ■ Biotechnology ■ Environmental and Analytical Chemistry ■ Environmental Biology and Ecosystems ■ Molecular Biotechnology ■ Space Science

Social and Community

Discover a rewarding career devoted to making a positive impact in the lives of others, addressing social issues and advocating for global change.

At RMIT, you'll learn from passionate and engaged academics who actively work towards a fairer world for all. You'll graduate with the skills and experience to make an impact in local and global communities.

Choose a university committed to change

RMIT has been teaching social work for more than 50 years and is ranked among the top five universities in Australia for sustainability impact.¹ We are committed to fostering initiatives and partners that advance sustainability on a global scale.

Gain real-world experience

Many of our social science courses offer internships or placements. Human service and community service organisations, NGOs, advocacy groups and government agencies are all part of our extensive network of partners.

Learn alongside industry leaders

RMIT's courses are taught by experts in the social and community sector and informed by industry partners, including the Environment Protection Authority (EPA), the Asylum Seeker Resource Centre (ASRC), Salvation Army Crisis Services, Oxfam Australia, Centrelink and more.

Career outcomes

Languages, translating and interpreting

Diploma of Interpreting (Auslan)*

Gain the skills you need to confidently interpret general dialogue and monologue settings in Auslan. Learn how to communicate across a range of subjects, including health and education, incorporating relevant cultural contexts and standards of ethical practice. Graduates pursue fulfilling roles in the community services sector, including education, welfare, government and more.

If you are a native English speaker, you will need to provide evidence of one of:

- completing your primary and secondary education (equivalent to Australian secondary education Year 12) at an institution/s where English was the primary language of instruction; or
- completing your secondary (equivalent to Australian secondary education Year 12) and tertiary education (Certificate IV or higher) at an institution/s where English was the primary language of instruction; or
- successfully completing a tertiary qualification (bachelor level or higher) where the language of instruction was English and the qualification was from one of the RMIT recognised English-speaking countries; or
- successfully completing an approved English proficiency test within the past two years.

AUSLAN skills assessment requirements:

- Applicants for the Auslan Interpreter stream must undertake a skills assessment in Auslan and English, which tests receptive (sight) comprehension skills and appropriate sign production and articulation skills in Auslan.
- Applicants will be contacted to schedule the skills assessment.

Prerequisites

Must meet both the English language requirements and the AUSLAN requirements specified below.

Diploma of Interpreting (Spoken Language)*

Advanced Diploma of Interpreting (Spoken Language)*

Learn how to help people overcome language barriers when accessing community services. The diploma is suitable for those who have bilingual skills, but have not yet reached a specialised language proficiency. The advanced diploma is designed for those who have advanced bilingual skills and want to interpret in specialised settings, use communication media in interpreting, and study and apply ethical principles in professional contexts.

If you are a native English speaker, you will need to provide evidence of one of:

- completing your primary and secondary education (equivalent to Australian secondary education Year 12) at an institution/s where English was the primary language of instruction; or
- completing your secondary (equivalent to Australian secondary education Year 12) and tertiary education (Certificate IV or higher) at an institution/s where English was the primary language of instruction; or
- successfully completing a tertiary qualification (bachelor level or higher) where the language of instruction was English and the qualification was from one of the RMIT recognised English-speaking countries; or
- successfully completing an approved English proficiency test within the past two years.

LOTE requirements. You must meet one of the following:

- Successful completion of a recognised Year 12 or senior secondary school qualification (equivalent to an Australian Year 12) taught in the LOTE you are applying to study in the course; or
- Successful completion of a tertiary qualification taught in the LOTE you are applying to study in the course; or
- Successful completion of an RMIT-administered LOTE test. The LOTE test includes reading, writing and translating from your second language into your first language (one of them must be English). Applicants will be able to complete the LOTE test as part of their Selection Task.

Deaf Interpreting stream:

- If you are applying to study the Deaf Interpreting stream, you must have successfully completed the S0134 Introduction to Deaf Interpreting Skill Set or you must complete a questionnaire to detail your current proficiency in deaf interpreting and provide evidence when required. You will receive this questionnaire via email after you submit your application. Selection will be based on the completed questionnaire. If further clarification is required, you may be asked to attend an interview.

Prerequisites

Must meet both the English language requirements and the LOTE requirements specified below.

Social work

Bachelor of Social Work (Honours)

Social workers promote the wellbeing of individuals, families and communities. In this accredited degree, you'll gain interdisciplinary knowledge about Australian society, social problems and human needs to foster social change and transform lives. Your studies feature 140 days of work placements and the opportunity to complete a capstone project in your fourth year.

Pathway options

- **Dip** of Community Services (1.5 years) plus **Bachelor of Social Work (Honours)** – Semester 1 entry only to BH105 (additional 4 years) = 5.5 years' total study

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

Bachelor of Social Work (Honours)/Bachelor of Social Science (Psychology) **Double degree**

Combine two highly respected and accredited degrees with a total of 140 days of placements to give you a unique, broad grounding across both social work and psychology. With your knowledge of social science, psychology and social work, you'll be eligible for a wide range of human services or community jobs.

Pathway options

- **Dip** of Community Services (1.5 years) plus **Bachelor of Social Work (Honours)/Bachelor of Social Science (Psychology)** – Semester 1 entry only to BH106 (additional 5 years) = 6.5 years' total study

Prerequisites

VCE Units 3 and 4 – a study score of at least 25 in English other than EAL or at least 27 in English as an Additional Language (EAL).

“

A highlight of my learning experience at RMIT was engaging in research for my assessments, with a particular highlight being my Youth Studies capstone project.

This involved doing a deep dive into how power, gender and social structures impact how young people receive and interpret consent education in secondary school.

Madi Vandersluys
Youth Work and
Youth Studies alum

This guide provides information about RMIT's Melbourne-based courses for Australian and New Zealand citizens and permanent residents of Australia. Prepared February 2025. Every effort has been made to ensure the information contained in this publication is accurate and current at the date of printing. Courses and subject content and requirements may be subject to change after publication of this guide. For the most up-to-date information, please refer to the RMIT University website before lodging your application.

Throughout this guide, we have used the following terminology:

- Course = Overall qualification (e.g. Bachelor of Science)
- Subject = Individual Unit (e.g. Chemistry Fundamentals CHEM1313)

Note that other material at RMIT (including some websites linked in this guide) may use different terminology, such as:

- Program = Overall qualification (e.g. Bachelor of Science)
- Course = Individual Unit (e.g. Chemistry Fundamentals CHEM1313)

If you have any questions about the terminology or need clarification before lodging your application, please contact Study@RMIT for assistance.
