2. Write the full form of these abbreviations:

1 x 10 = 10

1. OIL-RIG
2. ONGC
3. STD
4. OPEC
5. CNG
6. HIV
7. TSH
8. GH
9. AIDS
10. AMS

3. Give one word answer:

2 x 10 = 20

1. The coating of an electrically conductive item with a layer of metal using electric current.
2. A branch of chemistry that studies the reaction which takes place at the interface of an electronic conductor.
3. A reaction in which both oxidation and reduction are occurring.
4. Part of the female reproduction system, the embryo development takes place.
5. The pituitary hormone which facilitates child birth.
6. The product of fertilization.
7. The poisonous gas produced when coal is burnt in a closed room.
8. The mining of oil under sea.
9. A code, which enables blind persons to read and write.
10. The instrument that measures air pressure.

4. Define the following:

2 x 5 = 10

1. Hermaphrodite
2. Destructive Distillation
3. Carbonisation
4. Dispersion
5. Electrolysis

5. Difference between the following pair (any three)

4 x 3 = 12

1. Menarche and Menopause
2. External fertilization and Internal fertilization
3. Regular reflection and irregular reflection
4. Real Image and Virtual image

6.(A) Write answer in short:

4 x 3 = 12

1. State Faraday's first law of electrolysis.
2. What is natural gas? What are its component?
3. What are petro chemicals? Why are they so important?
4. What is an electrochemical reaction?

(B) Give reasons for the following:

4 x 3 = 12

1. Sportsmen use shoes with spikes.
2. Petroleum is also called 'Black Gold'.
3. Water must not be used on burning oil.
4. It is dangerous to touch a switch with wet hands.

7. Give answer in detail (any two)

5 x 2 = 10

1. Write in three points on the important life style that the adolescents should take care of.
2. Explain with diagram how coal formed in the earth.
3. What is friction? Explain the types of friction.

8. Draw neat and labelled diagram of anyone:

4

1. Destructive distillation of coal
2. Electric bell
