

Important Questions Class 7 English An Alien Hand Chapter 7

Question 1. Why was Tilloo restricted from the route?

Answer: Tilloo was a little child, which is why he never understood why his parents restricted him from his father's route. In addition, his father elaborated to Tilloo the reason for being forbidden to go to the surface of the planet. However, because the air is too thin to inhale and the temperature is too high, regular people will not be able to survive in the environment. An individual required a specially equipped suite with an oxygen reservoir and special clothing to be in the warm environment.

Question 2. How did Tilloo enter the restricted area?

Answer: Tilloo's father skipped work one day. Tilloo stole his father's security card while he was quietly taking a nap at home. He discreetly steered clear of his mother's watchful gaze and went directly to the restricted area. When he got there, he discovered a metal gate. He slid the security card in there, and the door silently opened. Tilloo approached a passage, but the security guards caught hold of him and carefully led him out before he could go any farther.

Question 3. Why was it so challenging for Tilloo to remain alive on the planet's surface?

Answer: For many years where Tilloo lived, everyone on the planet used to live peacefully. Contrary, the living conditions on the surface of that planet were hostile. The animals, birds, and fish became extinct; they had the technology to their advantage. . Tilloo's father, mother, and friends used to live underground in artificial conditions to survive.

Question 4. Why did NASA announce to the press conference that the mechanical hand had developed a problem?

Answer: When the Viking 1 spacecraft landed on the surface of Mars, everyone on Mars hid as they did not wish to tell others that life existed on the planet Mars. Everyone was watching the spaceship from the control room, where Tilloo was also transported. During that time, the mechanical land of the Viking 1 stopped functioning. It was discovered that Tilloo pressed the red button in the control room and ceased all the technical activities happening on the planet. A scientist from NASA announced that the mechanical hand from the spacecraft ceased to work.

Question 5. What response did everyone have when they learned the reality about the "thing"?

Answer: The Central Bureau's conference room was silent, as though nobody was present. Everyone anticipated that the President would make a statement. And as they were thinking, it took place. The President promises to update them on the two spacecraft's approach as soon as he receives information. They are from nearby worlds, and one was almost orbiting their planet while the other was far away.

Question 6. What has disrupted nature's balance?

Answer: The Sun became hostile, upsetting the harmony of the natural world.

Question 7. How were "they" able to manage to survive?

Answer: They were able to live due to their advanced technology.

Question 8. What had happened in the control room?

Answer: The following day, an alien spacecraft was seen on the huge TV, which caused great excitement in the Control Room.

Question 9. What was documented in the Central Bureau's archives?

Answer: The Central Bureau's collection had the records of highly evolved space programmes that had explored the solar system with human-crew and unmanned spacecraft to prove that they were alone in the solar system. .

Question 10. Why were the Central Committee members "unusually quiet"?

Answer: The Central Committee members knew the President would make a significant announcement.

Question 11. What revelations did the President make?

Answer: The President revealed that "Two spacecraft were reaching their planet."

Question 12. What details about the alien spacecraft did Tillo's father share?

Answer: They were permitted to see the extraterrestrial spaceship's movements, Tillo's father informed him. If any mischief was discovered, they could act.

**Question 13. Why do you think Tilloo should have listened to his elders?
Elaborate on your opinion.**

Answer: When Tilloo entered the security passage, it threatened the ongoing research. Further, the security staff brought him home, and to this, his father reprimanded and warned him not to interfere with the system.: because it was already difficult for them to survive on the surface of Mars. Moreover, Tilloo pushed the red button, creating another nuisance; that could reveal his identity. Besides this, he also damaged his mechanical hand. Therefore, he should have obeyed his parents' advice.

Question 14. What aspects of life would you find most challenging if you had to live in a house like Tilloo's?

Answer: The hardest part of life would be to live without freedom and away from open space. It will be like living in a cage in an open space, there would be no sightseeing. However, the compensation could be a harmonious environment, security, and peaceful life. We would have to get along well if we all shared underground buildings to live harmoniously.

Question 15. What is that thing which might drive mankind to make their homes underground?

Answer: Life on earth would be on the brink of extinction if the sun became colder and the temperature dropped below zero degrees or vice versa. People would be required to live underground, where they would have to depend on technology for a continuous supply of artificial light, oxygen cylinders, heat and other paraphernalia necessary for survival.

Question 16. What did options one and two recommend doing regarding the alien spacecraft?

Answer: Defence was overseen by the number one. He advised them to hold on until the craft touched the ground. Then they might easily render number two ineffectual, adding the advice to wait and see. Attacking the spaceship and revealing their presence would be foolish.

Question 17. What do you assume the mechanical hand was trying to do?

Answer: The mechanical hand was attempting to dig out the soil from the surface of the planet for examination.

Question 18. Why were the people in the control room excited?

Answer: Almost everyone in the control room was greatly excited because they spotted a dot on the TV screen in the background and they got to know two aircraft were approaching their planet.
